Engineer Avoids Wreck By Applying Brakes

Seeing a rail snap in front of him, Harry Pettier, engineer on the Pennsylvaia Railroad train which was going past Mankton, Md., about twenty-five miles north of Baltimore, about 6:30, Sunday, avoided a serious wreck by closing his throttle immediately. The engine, however, with the tender and baggage car, left the track The engine, however, with the tender and baggage car, left the track, the ten Pullman cars remaining on the rails. Pettier, with his fireman, escaped through the cab window as scalding steam from the boiler coded the cab and tender.

Some of the passengers were thrown from berths when the engineer put on the breaks, but none were injured.

HOROSCOPE.

Tuesday, July 31, 1917.

Again a doubtful day is read in the stars by the seers. While Mer-cury and Venus are in benefic aspect, Mars is congly-adverse. The signs at this time are most

ing for summer resorts than any this month. Extreme heat is prognosticated and much illness in cities.

There is a sign that appears to indicate that water supplies come under an influence making for contamination and even poison. ation and even poison.

Writers and publishers, advertisers and publicity agents have the sort of leading under this configuration. Love affairs should be fortunate today. It is a time in which poetry and romance have unusual potency. Whatever depends on iron and steel in the process of production may meet a new and serious problem. Again riots and disturbances, some

of them of serious character are fore-told. There is an influence making for tragic discontent. Grave conditions for certain legislators are indicated by the stars. These men, especially Congressmer, will be sadly misudged. Canada and the United States are

to have much correspondence of a diplomatic nature in the next few weeks, it is prophesied.

"Sceing is believing!" When your own eyes see the roots come out, you know the entire hair is gone, not merely the surface hair. You know that hair can never return.

Yes, it is really true that the new pheiactine method removes superfluous hair completely—roots and all—without the least injury, leaving the skin soft, smooth, hairless. You do the work in a jiffy, in your own home, without assistance. It does away with numerous and expensive visits to the electrolysis expert. Does away with depilatories or shaving at frequent intervals. Nothing like it ever known before. Perfectly harmless, odorless, non-irritating. Get a stick of phelactine, follow the easy instructions, and if not entirely satisfied the druggist will refund your money.—Adv.
